

Safety Data Sheet

according to 1907/2006/CE, Article 31 (Reach) and 1272/2008/CE (CLP)

Date : 19/10/2018

SECTION 1: Identification of the substance/mixture and of the company/undertaking

- 1.1 Product identifier
- Trade name: MAGIC'PLOP; MP15; MP100
- 1.2 Relevant identified uses of the substance or mixture and uses advised against
No further relevant information available.
- Application of the substance / the preparation: Lubricant / 1st medium paint / demoulding agent /
Insulation of electrical and / or electronic equipment
- 1.3 Details of the supplier of the safety data sheet
- Manufacturer/Supplier:
Cléopâtre
12, bd de Chinon
37510 BALLAN
Telefon: 0247801800
Fax: 0247801804
Email: info@colles-cleopatre.com
- 1.4 Emergency telephone number:
France (ORFILA 24h/24) - Tel: +33 (0)1 45 42 59 59
Ireland - Tel: 00 353 1 8092568 - 00 353 1 8379964 (24h/24) EU Tel: 112
Belgique - Tel: 32 070/245 245
UK: +44 (0)-870-190-6777 (CARECHEM24)

SECTION 2: Hazards identification

- 2.1 Classification of the substance or mixture
- Classification according to Regulation (EC) No 1272/2008 : **The product is not classified according to the CLP regulation.**
- 2.2 Label elements
- Labelling according to Regulation (EC) No 1272/2008 Not classified as hazardous for transport
- Hazard pictograms Not classified as hazardous for transport
- Signal word Not classified as hazardous for transport
- Hazard statements Not classified as hazardous for transport
- EUH208 Contains mixture of: 5-chloro-2-méthyl-4-isothiazolin-3-one [No. CE 247-500-7] and 2-méthyl-4-isothiazolin-3-one [No. CE 220-239-6] (3:1), 2-methyl-4-isothiazoline-3-one. Can produce an allergic reaction.
- 2.3 Other hazards
- Results of PBT and vPvB assessment
- PBT: Not applicable.
- vPvB: Not applicable.

SECTION 3: Composition/information on ingredients

3.2 Chemical characterisation: Mixtures

No substance meets the criteria set out in Part A of Annex II to REACH Regulation (EC) No 1907/2006.

Safety Data Sheet

according to 1907/2006/CE, Article 31 (Reach) and 1272/2008/CE (CLP)

Date : 19/10/2018

SECTION 4: First aid measures

- 4.1 Description of first aid measures
- General information: No special measures required.
- After excessive inhalation: Bring the person to a ventilated area outside the exhibition area.
- After skin contact: Remove soiled clothing and shoes. Wash skin thoroughly with soap and water and rinse thoroughly.
- After eye contact: Rinse opened eye for several minutes under running water.
- After swallowing: If symptoms persist consult a doctor. Rinse mouth and lips thoroughly with water.
- 4.2 Most important symptoms and effects, both acute and delayed:
No further relevant information available.
- 4.3 Indication of any immediate medical attention and special treatment needed:
No further relevant information available.

SECTION 5: Firefighting measures

- 5.1 Suitable extinguishing agents:
CO₂, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.
- 5.2 Special hazards arising from the substance or mixture:
A fire will often produce a thick black smoke. Do not inhale the smoke.
- 5.3 Advice for firefighters
Raising the temperature can cause a change of state of the liquids to steam, thus an increase in pressure which can lead to the explosion of the packages. Cool containers / containers in the vicinity of the fire with water spray.
Due to the toxicity of the gases emitted during the thermal decomposition of the products, the responders will be equipped with self-contained breathing apparatus.
Ensure that fire extinguishing tributaries are not discharged into water drainage systems, sewers or into a watercourse.

SECTION 6: Accidental release measures

- 6.1 Personal precautions, protective equipment and emergency procedures :
Refer to protective measures listed in sections 7 and 8. Ensure adequate ventilation. Do not touch or step on spilled material. Avoid contact with the spilled product. Immediately remove any contaminated clothing. Isolate the affected area. Keep unnecessary and unprotected personnel away. Stay / circulate upwind of the spill. Use appropriate protective equipment.
For emergency responders: responders will be equipped with appropriate personal protection equipment (refer to section 8).
- 6.2 Environmental precautions:
Contain and collect leaks with non-combustible absorbent materials, eg: sand, earth, vermiculite, diatomaceous earth in drums for disposal. Prevent entry into sewers or streams. The product must not contaminate groundwater. If the product contaminates bodies of water, rivers or sewers, alerting the competent authorities according to the regulatory procedures. Place the recovered waste in suitable, closed and properly labeled containers for disposal according to the regulations in force (see section 13).
- 6.3 Methods and material for containment and cleaning up:
Stop the flow, if the intervention is possible without risk. Collect by pumping or contain the product with absorbent material (sand, earth, vermiculite, kieselguhr, acid neutralizer, universal binder, sawdust). Place in suitable containers, closed and properly labeled. Store and dispose in accordance with regulations. Contaminated absorbent materials may present the same risks as the spilled product. Note: see section 1 for emergency contact and section 13 for waste disposal. To clean soil or objects soiled with this product, use a suitable solvent (see section 9). Wash contaminated area with plenty of water. Incinerate in an appropriate combustion chamber.

Safety Data Sheet

according to 1907/2006/CE, Article 31 (Reach) and 1272/2008/CE (CLP)

Date : 19/10/2018

· 6.4 Reference to other sections:

See section 1 for emergency contact. Information on exposure controls / personal protection can be found in section 8 and protective measures for handling in section 7. For advice on disposal of accidentally spilled material, see section 13.

SECTION 7: Handling and storage

The requirements for storage rooms are applicable to the workshops where the mixture is handled.

· 7.1 Precautions for safe handling:

Wash your hands after every use. Avoid the formation of vapors, mists or aerosols. Avoid breathing vapors and avoid contact with this product. The workstation and methods will be organized to prevent or minimize direct contact with the product. Do not wipe your hands with dirty cloths / cloths. Provide water station and / or safety shower and / or eye fountain near workstations. Ensure proper operation.

Recommended equipment and procedures:

For personal protection, see section 8. Observe the precautions on the label as well as the regulations for the protection of the work. The opened packaging must be closed carefully and kept upright.

Prohibited equipment and procedures:

It is forbidden to smoke, drink and eat in the premises where the mixture is used.

· 7.2 Conditions for safe storage, including any incompatibilities

The storage area is on retention.

Storage: Keep away from incompatible products (see section 10). The floor of the premises will be impervious and arranged in such a way as to allow the recovery or the neutralization of the product which could spread in the event of a leak. Store in a cool, dry place with adequate ventilation.

Packaging: Always keep in packaging of the same material as the original. Suitable packaging materials: steel coated with epoxy resin.

Keep preferably in the original packaging, if not, use appropriate packaging (approved) and postpone, if applicable, all the indications of the regulatory label on the new packaging.

· 7.3 Specific end use(s): No further relevant information available

SECTION 8: Exposure controls/personal protection

· 8.1 Control parameters

No further relevant information available

· 8.2 Exposure controls

Appropriate control measures for a workplace depend on how the product is used and the potential for exposure. If collective protection equipment (technical means, procedures) is not effective in the prevention or control of exposure, personal protective equipment must be used.

Appropriate technical controls:

Ensure adequate ventilation, if possible, by vacuuming at workstations and by proper general extraction.

Individual protection measures, such as personal protective equipment:

Use personal protective equipment that is clean and properly maintained. Store personal protective equipment in a clean place away from the work area. When using, do not eat, drink or smoke. Remove and wash contaminated clothing before reuse. Ensure adequate ventilation, especially in confined areas.

Eye / face protection:

Avoid contact with eyes. Use eye protection designed against liquid splashes. If splashing or splashing is likely, wear safety glasses with side shields.

Hand protection:

Wear appropriate protective gloves in case of prolonged or repeated contact with the skin.

Type of gloves recommended:

- Nitrile rubber (butadiene-acrylonitrile copolymer (NBR))
- PVC (Polyvinyl chloride)

Safety Data Sheet

according to 1907/2006/CE, Article 31 (Reach) and 1272/2008/CE (CLP)

Date : 19/10/2018

The adaptability and durability of a glove depends on its use, for example the frequency and duration of contact, the chemical resistance of the material constituting the glove, its thickness, dexterity. It is recommended to always seek advice from glove suppliers.

Body protection:

Staff personnel will wear a regularly cleaned work uniform. After contact with the product, all soiled parts of the body should be washed.

Respiratory protection:

If technical measures and collective protective equipment do not allow the concentrations of substances in the air to be maintained at an adequate level to protect the health of workers, the wearing of approved personal respiratory protection equipment is necessary. Wear a respirator with a combination filter (filter against dust and gas) during spraying operations.

SECTION 9: Physical and chemical properties

· 9.1 Information on basic physical and chemical properties

· General Information

· Appearance:

Form: Viscous liquid

Colour: Colorless

· Odour: Odorless

· Odour threshold: Not determined.

· pH-value: Not determined.

· Change in condition

. Melting point/Melting range: Undetermined.

. Boiling point/Boiling range: Undetermined.

· Flash point: 280°C

· Flammability (solid, gaseous): Not applicable.

· Ignition temperature: >400°C

· Decomposition temperature: Not determined.

· Self-igniting: Product is not self-igniting.

· Danger of explosion: Product does not present an explosion hazard.

· Explosion limits:

Lower: Not determined.

Upper: Not determined.

· Vapour pressure: <0,1 hPa (20°C).

· Density: approx. 0,96 (20°C)

· Relative density: Not determined.

· Vapour density: Not determined.

· Evaporation rate: Not determined.

· Solubility in / Miscibility with water:

Very slightly soluble: acetone, ethanol.

Miscible (in all proportions): diethyl ether, aliphatic hydrocarbons, aromatic hydrocarbons, chlorinated solvents.

· Segregation coefficient (n-octanol/water): Not determined.

· Viscosity:

. Dynamic: Not determined.

. Kinematic: Not determined.

· 9.2 Other information: No further relevant information available.

Safety Data Sheet

according to 1907/2006/CE, Article 31 (Reach) and 1272/2008/CE (CLP)

Date : 19/10/2018

SECTION 10: Stability and reactivity

· 10.1 Reactivity:

Refer to incompatibilities (10.5) and possible dangerous reactions (10.3).

· 10.2 Chemical stability

This product is stable under the handling and storage conditions recommended in section 7.

· 10.3 Possibility of hazardous reactions: No dangerous reactions known.

· 10.4 Conditions to avoid: No further relevant information available.

· 10.5 Incompatible materials: Keep away from strong oxidizing agents.

· 10.6 Hazardous decomposition products:

Thermal decomposition may release / form carbon monoxide (CO), carbon dioxide (CO₂), amorphous silica. Thermal decomposition or burning may release toxic gases or vapors.

SECTION 11: Toxicological information

· 11.1 Information on toxicological effects

No further relevant information available.

11.1.1. Substances

No toxicologist information is available on the substances.

11.1.2. Mixture

Acute toxicity: Hopes: Rat
LD50 > 5000 mg / kg

Hopes: Rat
LD50 > 2000 mg / kg

Respiratory or skin sensitization: Estimated to be non-sensitizing to skin.

Germ cell mutagenicity:

In vitro tests: no effects expected (estimate based on the substances present)

SECTION 12: Ecological information

· 12.1 Toxicity

Acute toxicity:	
CL 50 (96h)	Not considered toxic to fish.
CE 50 (48h)	Not presumed to be harmful to aquatic organisms.
Chronic toxicity:	
CE 50 (72h)	Not presumed to be harmful to aquatic organisms.
NOEC (72h)	Not presumed to be harmful to aquatic organisms.

· 12.2 Persistence and degradability: not quickly degradable.

· 12.3 Bioaccumulative potential: no bioaccumulation expected

· 12.4 Mobility in soil: No further relevant information available.

· Additional ecological information:

· General notes:

Water hazard class 2 (German Regulation) (Self-assessment): hazardous for water

Do not allow product to reach ground water, water course or sewage system.

Danger to drinking water if even small quantities leak into the ground.

· 12.5 Results of PBT and vPvB assessment

· PBT: Not applicable.

· vPvB: Not applicable.

· 12.6 Other adverse effects : No further relevant information available.

Safety Data Sheet

according to 1907/2006/CE, Article 31 (Reach) and 1272/2008/CE (CLP)

Date : 19/10/2018

SECTION 13: disposal consideration

Appropriate management of the wastes of the mixture and / or its container shall be determined in accordance with the provisions of Directive 2008 / 98EC.

· 13.1 Waste treatment methods

Do not pour into drains or streams.

The waste producer must determine the appropriate disposal methods based on the waste classification (depending on the hazard of the waste generated and the use of the product.). If possible recover or recycle.

Waste:

Waste management is done without endangering human health and without harming the environment, and in particular without creating any risk for water, air, soil, fauna or flora. Recycle or dispose of in accordance with current legislation, preferably by a collector or an approved company. Do not contaminate soil or water with waste, do not dispose of in the environment.

Soiled packaging:

Empty the container completely. Keep the label on the container. Give to a certified disposal contractor. Dirty packaging is to be emptied optimally; they can be recovered / recycled / reused after being properly cleaned.

Waste codes (Decision 2104/955 / EC, Directive 2008/98 / EEC on hazardous waste):

Product not used: 07 02 17

SECTION 14: Transport information

- 14.1 UN-Number: Not applicable.
- 14.2 UN proper shipping name: Not applicable.
- 14.3 Transport hazard class(es): Not applicable.
- 14.4 Packing group: Not applicable.
- 14.5 Environmental hazards: Not applicable.
- 14.6 Special precautions for user: Not applicable.

SECTION 15: Regulatory information

- 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture
- Classification and labeling information in section 2:

The following regulations have been taken into account:

- Regulation (EC) No 1272/2008 as amended by Regulation (EU) No 487/2013
- Regulation (EC) No 1272/2008 as amended by Regulation (EU) No 758/2013
- Regulation (EC) No 1272/2008 as amended by Regulation (EU) No 944/2013
- Regulation (EC) No 1272/2008 as amended by Regulation (EU) No 605/2014
- Regulation (EC) No 1272/2008 as amended by Regulation (EU) No 1297/2014
- Information about the packaging: No data is available.
- Particular dispositions : No data is available.

- 15.2 Chemical safety assessment: A Chemical Safety Assessment has not been carried out.

SECTION 16: Other information

Since the user's working conditions are not known to us, the information given in this safety data sheet is based on the state of our knowledge and on both national and Community regulations.

The mixture must not be used for other purposes than those specified in section 1 without first obtaining written handling instructions.

It is always the responsibility of the user to take all necessary measures to meet the requirements of

Safety Data Sheet

according to 1907/2006/CE, Article 31 (Reach) and 1272/2008/CE (CLP)

Date : 19/10/2018

local laws and regulations.

The information given in this safety data sheet shall be considered as a description of the safety requirements for this mixture and not as a guarantee of the properties of the mixture.

· Abbreviations and acronyms:

ADR: Accord européen sur le transport des marchandises dangereuses par Route (European Agreement concerning the International

Carriage of Dangerous Goods by Road)

IMDG: International Maritime Code for Dangerous Goods
